

# Wording Challenge #1

Submitted by "i44troll"

- 1) Change your screen color to "black"
- 2) Draw a "temporary point" at X0Y0
- 3) Create a 2" diameter circle anchoring the center of the circle to the temporary point
- 4) Draw one vertical line and one horizontal line starting from the temporary point so that the results look like a round analog clock whose hands are positioned at "3 o'clock". (line length doesn't matter)
- 5) Convert the circle to 28 lines
- 6) Select the full drawing and slide the endpoints of the lines to the vertical and horizontal lines
- 7) Erase the vertical and horizontal "3 o'clock" lines and the temporary point
- 8) Reposition the drawing so that it is in full view but only occupies the top 2" of your viewable screen. Also, keep it centered.
